PROJECTS

Kindly find below some of my masterminded project details which are all hosted on my github pages : <https://github.com/kishky101/>

- [SpringBoard Language Academy Website](#)

I masterminded the development of the front end of this website using HTML, CSS and JavaScript.

- Background Generator Website

I created a simple app that let front end engineers visualize a mix of color randomly and automatically generate the CSS code.

- My portfolio

I built my portfolio from scratch with a very beautiful design and responsiveness using just HTML and CSS.
